SUMMARY

Software Engineer experienced in designing and developing production-ready web applications across frontend, backend, and database layers. Skilled in API development, database design, and scalable software architecture. Passionate about building reliable, maintainable software and solving real-world engineering problems.

EXPERIENCE

Software Engineer — Infotraid Technology

Oct 2024 – Present | Bhaktapur, Nepal

- Developed and maintained web applications for clients across e-commerce, consultancy, and business domains, contributing to both frontend and backend development.
- Worked closely with clients to understand requirements and translate them into practical, user-focused software solutions.
- Designed database schemas and REST APIs, selecting appropriate technologies and architectures based on project requirements.

Full Stack Developer — Lipyinfotech

Jul 2024 – Oct 2024 | Bhaktapur, Nepal

- Built and maintained full-stack web applications, developing features across both frontend and backend components.
- Created responsive user interfaces and implemented RESTful APIs for multiple client projects in a fast-paced development environment.
- Collaborated with team members to deliver features, fix issues, and improve application performance and usability.

KEY PROJECTS

RestroSphere — A modern restaurant management system (Next.js, Nest.js, Tailwind CSS, PostgreSQL)

- Built a restaurant management system supporting order processing, table management, menu administration, and business operations through a centralized dashboard.

The Khwopa — E-Commerce Platform (Next.js, Express.js, Tailwind CSS, PostgreSQL)

- Developed an e-commerce platform with 20+ REST APIs, supporting inventory management, secure authentication, and order processing.

Consultancy Portal (Next.js, Express.js, Tailwind CSS, PostgreSQL)

- Developed a consultancy management platform that streamlined student application tracking and workflow management.

Data Analytics Portal (Next.js, Express, Prisma, PostgreSQL)

- Developed scalable backend services and optimized relational database design for structured research data management.

Business Website Portal (Next.js, Express, Tailwind CSS, PostgreSQL)

- Developed an SEO-optimized business website with an integrated content management system for non-technical users.

AI Chatbot (RAG-Based) (FastAPI, Retrieval-Augmented Generation, Vector Databases)

- Developed a Retrieval-Augmented Generation (RAG) chatbot using FastAPI and vector databases to provide context-aware responses from indexed documents.

General Examination Management System (Next.js, .NET Web API, PostgreSQL)

- Built a full-stack examination system to simplify academic management. It features secure student login and integrated payment processing, allowing users to settle fees and register for exams online.

TECHNICAL SKILLS

Frontend: Next.js, React.js, Tailwind CSS, Responsive & Component-Driven Design

Backend: Node.js, Express.js, .NET, RESTful API Design, Authentication (JWT)

Database & ORM: PostgreSQL, MySQL, Prisma, EF Core

DevOps & Tools: Docker, Linux, Bash, Git/GitHub, CI/CD Basics

Other: FastAPI, RAG Architecture, Vector Databases, Agile Collaboration

EDUCATION

B.Sc. in Computer Science and Information Technology

Tribhuvan University (TU), Bhaktapur Multiple Campus — Bhaktapur, Nepal | 2022 – Present
